Re: **VISA Account Updater (VAU)**

As of October 1, 2017 VISA will implement a new service labeled **VISA Account Updater**. This service is a free benefit to you to help facilitate uninterrupted processing of your recurring payments. The **VISA Account Updater** service provides updates only to qualified participating merchants with whom a cardholder has established card-on-file (COF) account information to process their recurring payments. You may opt-out of the service if you choose. To opt-out, please sign this letter at the bottom of the page and return it to us at your convenience. Before deciding to, or not to, opt-out please consider these benefits:

- You should have seamless card information updated for participating merchants once new or reissued cards are received – reducing the likelihood of service interruptions for subscriptions or recurring payments.
- You should have an improved experience and satisfaction due to the reduced likelihood of denials when card information is updated automatically for participating merchants.
- VAU should lessen the possibility of some late fees and service disruptions with utility companies or other subscriptions with participating merchants.

If you choose not to opt-out of the VISA Account Updater service you do not need to do anything.

By signing below I choose to opt-out of the **VISA Account Updater** service offered by VISA.
